Undergraduate Research Fellows Program

with

the School for the Future of Innovation in Society

The SFIS Undergraduate Research Fellows (SURF) Program is designed to give undergraduate students across ASU a chance to develop research and critical thinking skills by contributing to a research project on a science & society topic. Come gain research experience – and earn a stipend or research credits!

This semester, we invite students to work with faculty on researching topics as diverse as experimental stem cell treatments, smart cities, self-driving cars, and displaced refugees in Bangladesh. Through the Undergraduate Research Fellows program, you will have the opportunity to develop strong research skills and present your findings at an end-of-semester research symposium.

Research Fellows can choose to receive a stipend ($1200 per semester) or research credit (2 credits per semester). You will be expected to spend 5-7 hours per week as a Research Fellow, including a weekly meeting with your faculty mentor.

More details about the program and available projects for Fall 2018 are available at: https://sfis.asu.edu/student-life/opportunities.

Applications are due by 11:59pm on Friday May 18th. Research projects will start the week of August 20th, 2018. Online applications for Research Fellow positions are available at: https://sfis.asu.edu/student-life/opportunities

For questions, please contact Elisha Thompson (Elisha.Thompson@asu.edu).
